

6ft by 4ft Raised bed planting plan No.4

14 or 21 inch high 6ft by 4ft Raised Bed Planting Plan No.4

The plant choices start at the back of the bed with the tallest plants with height gradually decreasing as you move towards the front. The bed should be placed facing south if possible to take best advantage of available light.

You will need to add a trellis or pea and bean net to the back of this bed to support the climbing plants. This can be retrofitted to the bed using our trellis kit or you can order a bed including trellis and mesh posts.

Planting key

Please see below the planting plan for the crops included in this bed.
